

“JUST-A-FALLS” WATERFALL KITS

Build a waterfall without a pond — ideal for businesses and home owners who want the sights and sounds of a waterfall but do not want the liability or maintenance associated with a pond!

Just-A-Falls built by Aquatic Rock in Minnesota

Just-A-Falls kits include a waterfall spillway for easy installation!

The waterfall/stream portion of a “Just-A-Falls” system is built the same as a normal water feature, however, the retention basin at the bottom is much easier and faster to build than a normal pond. Since you simply need a reservoir to hold water in, you do not need any decorative shape or ledges built in. Simply dig the hole, install liner, place vault in hole and fill with rock or reservoir cubes.

Just-A-Falls built by Natural Creations in Michigan

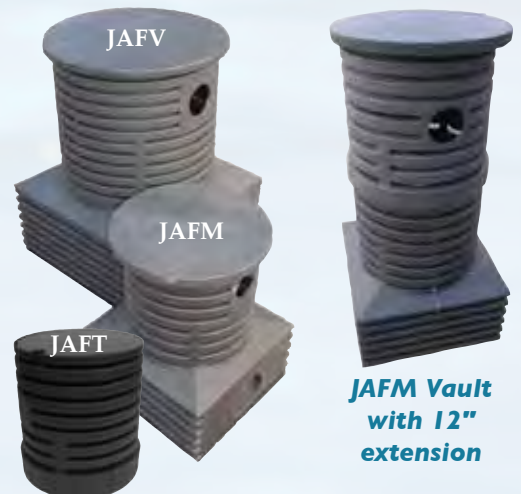

EASYPRO PUMP VAULTS

The EasyPro Pump Vaults are built heavy duty to withstand the pressure of being buried under rock. The vaults have slots cut in the sides which allows water into the pump. The maximum flow rates for each vault is listed below.

- **JAFM** — maximum flow is 50 GPM (3,000 GPH).
- **JAFM** — maximum flow is 100 GPM (6,000 GPH).
- **JAFV** — maximum flow is 250 GPM (15,000 GPH).

A 12" extension is available for the JAFT and JAFM vaults. This allows you to dig your reservoir deeper (great for tight areas) and still have easy access to the pump. Multiple extensions can be used if needed.

Part #	Description	Dimensions L x W x H	Ship Weight
JAFT	Mini Vault	13" x 13" x 14 1/2"	5 lbs.
JAFM	Small Vault	16" x 16" x 22"	25 lbs.
JAFV	Large Vault	24" x 24" x 32"	54 lbs.
JAFME	Extension for JAFT & JAFM	12" tall	5 lbs.

JAFM Vault with 12" extension

COMPLETE “JUST-A-FALLS” WATERFALL KITS

Buy a complete kit and save money!

“Just-A-Falls” kits include everything you need to build a beautiful waterfall including:

- 45 mil rubber liner
- Flexible PVC pipe
- Waterfall spillway
- EasyPro pond vault
- Felt underlayment
- WIK installation kit
- Check valve assembly
- Submersible pump

Build a waterfall without a pond — ideal for businesses and homeowners who want the sights and sounds of a waterfall but do not want the liability or maintenance associated with a pond!

Small Kit - 7' stream with 18" wide waterfall, enough liner for a 5' x 5' x 2' reservoir with 9' left over for stream

Medium Kit - 11' stream with 34" wide waterfall, enough liner for a 5' x 6' x 2' reservoir with 14' left over for stream

Large Kit - 18' stream with 50" wide waterfall, enough liner for a 8' x 10' x 3' reservoir with 20' left over for stream

Extra Large Kit - 30' stream with 82" wide waterfall, enough liner for a 10' x 12' x 3' reservoir with 30' left over for stream

Part Number	Description	Liner	Underlayment	Spillway	Pond Vault	Pump	Check Valve	Flex Pipe	Shipping
JAF1	Small JAF Kit	10' x 20'	10' x 20'	18"	JAFM	TH150	2"	25' x 2"	UPS
JAF2	Medium JAF Kit	10' x 25'	10' x 25'	34"	JAFM	TH400	2"	25' x 2"	UPS
JAF3	Large JAF Kit	15' x 40'	15' x 40'	50"	JAFV	EP10000	3"	33' x 3"	Freight
JAF4	Extra Large JAF Kit	20' x 50'	(2) 10' x 50'	82"	JAFV	EP16000	3"	50' x 3"	Freight

Above kits are available with the necessary res-cubes figured in! Using cubes reduces the reservoir size needed as well as the amount of rock. The liner size is the same so building a smaller reservoir leaves more liner for a longer stream. All other components in each kit is the same as shown above.

Part Number	Description	Res-Cubes Included
JAF1RC	Small JAF Kit with Res-Cubes	18
JAF2RC	Medium JAF Kit with Res-Cubes	24
JAF3RC	Large JAF Kit with Res-Cubes	69
JAF4RC	Extra Large JAF Kit with Res-Cubes	96
