

Just-A-Falls

Build a waterfall without a pond — ideal for businesses and home owners who want the sights and sounds of a waterfall but do not want the liability or maintenance associated with a pond.

The waterfall/stream portion of a "Just-A-Falls" system is built the same as most water features, however, the retention basin at the bottom is much easier and faster to build than a normal pond. Since you simply need a reservoir to hold water in, you do not need any decorative shape or ledges built in. Simply dig the hole, install liner, place vault in hole and fill with rock or reservoir cubes.

Just-A-Falls

All EasyPro Just-A-Falls kits include everything you need to build a beautiful, top quality feature: waterfall spillway, liner, underlayment, PVC pipe, check valve assembly, pump, pump vault and instruction manual. A selection of kits offer equipment options and streams from 7' to 30' long.

ECO-Series Kits

ECO-Series®

Enjoy the sound of water with an Eco-Series Just-A-Falls kit. This is the ideal system for the backyard "Do-it-Yourselfer." These kits include simple to install, one piece spillways. Our patented Spliner Lock system attaches the stream liner to the spillway without silicone, bolts or tools. Each of these kits are designed with the ease of installation in mind.

Waterfall Diffuser Kits

Incorporate our unique waterfall diffuser for quick, easy, professional looking systems. These spillways are made to last and require less excavation than a tub style spillway. The low profile, 3 1/2" design makes them easy to conceal. Each pump is matched to provide even flow from the diffuser all the way down the stream to the Res-Cube basin.

Pro-Series Kits

PRO SERIES

Take full advantage of your space with a Pro-Series Just-A-Falls kit. These professional grade components marry the water feature with the terrain, creating a high quality focal point in the landscape. Pro-Series spillways include a grate just below the water level to stack stone, hiding the spillway from view. Each Pro-Series kit is available with Res-Cubes to maximize space and holding capacity.

Just-A-Falls Components:

- Liner
- Underlayment
- Spillway
- Pump Vault
- Pump
- Plumbing assembly
- Flex PVC pipe
- Installation kit

Res-Cubes are model specific and not included in all kits

Large Waterfall Diffuser Kit

Please remember if one of our Just-A-Falls kits does not meet your needs, customized kits are available by request.
